Healing Hands:
Dr. Desrene Brown

By Franz Melton Wright

Dr. Brown primarily deals with maintaining a woman’s health and her sense of well being. She empowers women by giving them vital information, promoting their confidence and encouraging healthy lifestyles. She has recently added the best available FDA approved aesthetics to her prestigious private practice. NWOH OB/GYN is pleased to offer truSculpt 3D and the Juliet Laser.

NW OH OB/GYN staff as well as Dr. Brown are well known for their friendly, courteous, and expert care of their patients. This care includes annual checkups, contraception counseling, heavy or painful periods, menopause or painful intercourse, vaginal infections, urinary problems and so on.

In addition, Dr. Brown is trained in robotic surgery. Before this type of surgery was introduced to the world of medicine, undergoing surgery involved a longer hospital stay and frankly more pain. These robots now allow doctors like Dr. Brown to navigate surgeries safely and expeditiously. This allows patients to go home the same day with minimum post-operative pain while reducing recovery time.

NW OH OB/GYN boasts a loyal patient base—patients travel from afar—Cleveland, Columbus, Cincinnati, and Dayton to see Dr. Brown. A recent heartwarming trend at the practice has been the addition of new patients who themselves were delivered by Dr. Brown; a trend that just thrills her.

Her kindness and healing continue to keep her patients happy and healthy.

HOW CAN SHE HELP YOU HEAL?

Dr. Desrene Kerry-Ann Brown is an experienced doctor and a fantastic surgeon at the Department of Obstetrics & Gynecology of Lima Memorial Hospital. She provides top notch service to each and every one of her patients. Dr. Brown has been enjoying private practice at the Northwest Ohio Ob/Gyn (NW OH OB/GYN) for just under 20 years now. She states that the “community feel” is a nice way to practice in comparison to the hustle and bustle of a greater metropolitan area.

As a board certified Obstetrician, Gynecologist and Surgeon, Dr. Brown is continually informed of the latest studies, advances and procedures in her field. She completed medical school at the University of Medicine and Dentistry of New Jersey, followed by a four year residency at the College of Physician and Surgeons of Columbia University in Manhattan.

Following completion of her residency in New York City, Dr. Brown relocated to Bluffton, Ohio in 1999 and has been proud to serve her patients in the Bluffton, Ottawa, Findlay and many of the other surrounding communities since 2001. As a staunch supporter women’s health and education, Dr. Brown has also provided gynecological care to women outside of the United States, educating and increasing their awareness of screening for cervical cancer, gynecological health, and personal wellness.

Dr. Brown has stayed abreast of the latest technology offered to assist women in their vulvovaginal health. This includes treatments for urinary incontinence and vaginal laxity while also benefiting their intimate sexual health. She became the first physician in the state of Ohio to offer the FDA approved Juliet laser which has assisted millions of women around the world before recently becoming available in the United States.

Dr. Brown has been a vital part of the Bluffton Community and its hospital for the past 19 years and counting. She has been trusted to care for and to deliver innumerable patients whom she counts as neighbors and friends.

In her spare time you may find Dr. Brown on the tennis courts perfecting her serve, enjoying life while laughing with her husband and daughters, neighbors and friends.
