

The morning
hoar-frost
came to
Bluffton

Bluffton  **ICON**

Bluffton scenes following a zero-degree hoar-frost in Bluffton on January 15, 2015

Under clear frosty nights in winter soft ice crystals might form on vegetation or any object that has been chilled below freezing point by radiation cooling. This deposit of ice crystals is known as hoar frost and may sometimes be so thick that it might look like snow.

Man's life? A candle in the wind, hoar-frost on stone. - Carl Sandburg
