Green House Living

at
Willow Ridge

*Transforming
Nursing Home Care*

Home is where the hearth is. Each Green House home provides private bedrooms with full bathrooms surrounding a common hearth room complete with fireplace, sofas and recliners. An open kitchen allows elders and visitors to watch and enjoy meals prepared in their presence. A front porch, back patio and large back yard provide opportunities to visit with neighbors and enjoy God's creation. *(THE GREEN HOUSE® Project is a project of NCB Capital Impact which is committed to replicating and sustaining the Green House model of care throughout the United States.)*
